Subject: Please read this note about Interagency Comments on the EPA Ozone NAAQs and consider whether we need to meet tomorrow

Thanks Karen for noting that. I just finished reading the comments and as you say, there are many on the RIA, focusing on both costs and benefits issues, so Ron, Darryl, Kathy. Bryan and Amy will need to look at these. I'm adding Darryl and Amy to this list, as well as Mary Ross and John V just so they can see what are obviously Tom Grahame's comments on the mortality studies.

One question I have is whether we should have a meeting tomorrow among the EPA folks to go over these comments and prepare for a meeting with Christine. Now that we have all these comments I suspect that we may be pushed to respond fast. And while we may be able to wait until Monday to meet with OMB, we also may not. What do folks think? I'm adding John Hannon, Lea, Anna and Scott to the addressees so they can comment. Also Chet and James so they are in the loop.

Although the note from Christine says that comments on the RIA will be sent separately, I note that this set of comments does include a lot of comments on the RIA, starting on p. 7 -- including a long discussion of ozone mortality studies (starting on p. 13), leading to the recommendation from a "set of commenters" that "EPA remove the assumption that ozone is associated with mortality impacts" (p. 20).

---

Here are comments on the ozone rule. I assume they cover both rules, but not monitoring as Christine said no one had offered comments on that. RIA comments to follow later.

Hi Everyone,

Attached please find interagency comments on the Ozone rulemaking package. We will send a redline set of interagency comments on the draft RIA under separate cover but wanted to get these to you tonight. Please let us know if you have any questions.

Thanks, and have a great evening,

Christine
